SE project MEETING MINUTE

4.1.2016	PM 4:30	1 공 305 호
회의 소집인	(PM)Jake Kim	
회의 종류	전체 회의	
진행자	(PM)Jake Kim	
서기	SeungYeon Woo	
참석자	SeungYeon Woo, HyungLak Kim, Jake Kim, Song Hyeong Seok, Sung Da Hae, hakjin, seonwoong, zhiqiang, 김진희, ahnyoungeun	

[AGENDA]

OLD BUSINESS
Select project topic among 2(travel tracker vs. hanyang university app.)

NEW BUSINESS
1.   How to provide service(in which way)?
2.   Which requirements are developed among suggested
3.   Decide regular meeting time of one week.
4.   Choose development method (scrum vs. xp)

[OLD BUSINESS]

Select project topic
1. Hanyang university application : made new version of hanyang university application that have minimum functions. With better design and faster access to every pages. In independent android platform.(below are specified functions), Travel journal(show travel route and match place with pictures taken), Recommend optimal route using geographical information and hash tag, Show other peoples travel information of current location, Share the photo(if select share function), Rank for travel spot, Record travel expenses and transportation used, Categorize the travel spots by characteristic of the place(mountain, sea, city …)
2. Travel tracker : Record the travel route in every 5 minutes using GPS sensor and record taken pictures of that location that user drop by.(below are specified functions) Check available seats at library, Meal tables for cafeteria in the school, Dynamic design, Inprove accessability, Shuttle bus time table, Campus schedule, numbers for school facilities, mobile ID, grades, timetable, board, specify user(undergradustes or graduate students), dormitory application, search books on library

Decision
Hanyang university app. is selected

[NEW BUSINESS]

1. How to provide service(in which way)?(mobile or web)	
Mobile app.	Develop android application
IOS users also have a need for application. So develop IOS application not only android application for users	
Dynamic web	develop with dymanic app. and users can access with web browsers with their
Easy to develop but not practical because user can only access with web browser	
Dynamic web & android app with dynamic	User can access with web browsers in dynamic web. And also made dynamic web page is loaded in android application
Can release application only in android market, not iphone market	
iphone users can't access through mobile application but can access through their mobile web browsers	
Easier way to develope application that gives both 2 types of user(android/ios) can use.	
Decision	
Dynamic web & android app with dynamic web is predominant. But make vote on Trello for	

2. Which requirements are developed among suggested
1. Library study seat check
2. restaurant menus
3. shuttle bus time table
4. Campus Schedule
5. Phone number information
6. Mobile student ID card
7. class time table for student
8. Grade
9. Free board
10. Dormitory App.
11. search book in library
All members should vote for 5 most needed functions
Decision
Vote on Trello

3. Decide regular meeting time
Decide regular meeting time
Weekend is impossble because some have their part-time job. Vote through Trello
Decision
Vote through trello with upload their possible time for meeting

4. Choose development method (xp vs. scrum
Upload each presentation files on Trello and make vote on Trello
Decision
Vote on Trello

[NEXT MEETING]

Unsettled

[NEXT MEETING AGENDA ITEM]

Specify the requirements that is voted for SRS

Upload each presentation files on Trello and make vote on Trello
